

JAVA, MULTOS, and MIFARE based technologies have returned as certified VISA, MasterCard (PayPass, PayWave) contact and contactless support.

PROCEED Transportation Card

Eliminate cash transactions and paper-based vouchers with the SmartSoft PROCEED Transportation Card Solution.

Prepaid Solutions

Introduction

SmartSoft provides a proven and tested innovative, efficient, and robust multi-application prepaid card solution to the transportation industry, for all kinds of public transportation, with VISA and MasterCard's contact and contactless card supports.

The Transportation card concept targets the extension of credit and debit card usage beyond regular payment transactions. The system also provides comprehensive loyalty and campaign management features at a wide range of acquisition terminals (transportation, gateways, tools etc.).

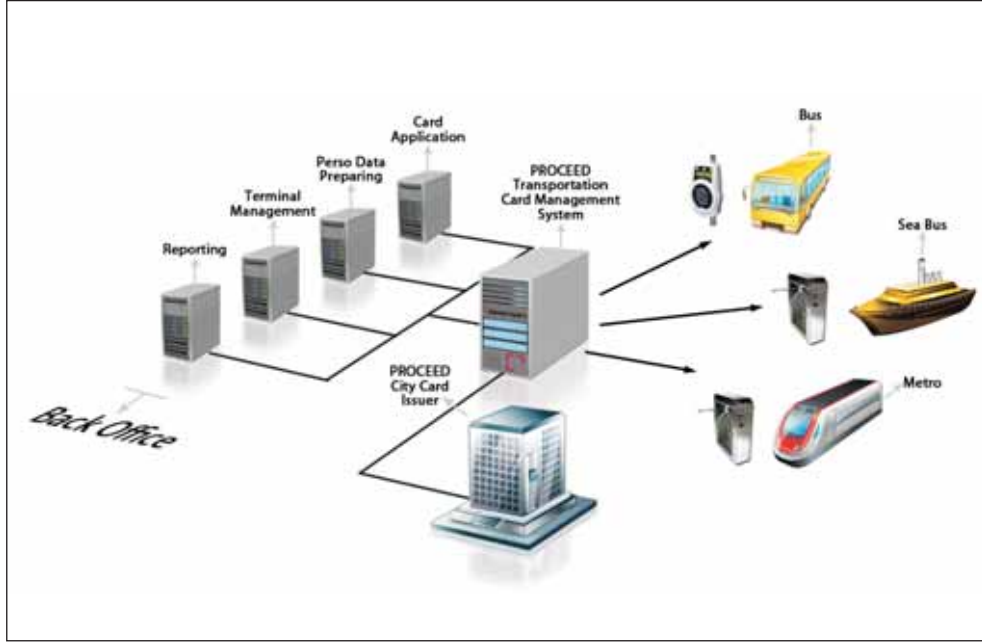

The PROCEED prepaid card management system provides complete solutions for the mass transit sector. With the PROCEED solution, it makes managing underground transport, buses, ferries, and automated car park ticketing much easier. The system provides convenience, speed, and security for its users.

Areas of Use

- Bus
- Gateway
- Train
- Taxi
- Shuttles (city, airport, school, activities etc.)

Functionality

- Personalization (combine ticket) or no name card management
- Terminal management (POS, KIOSK, unattended terminal etc.)
